

Technical Specification

F-680 · Steam-enabled fabric cleaning machine

Parameter	Documented value
Power supply	220 V / 50 Hz
Suction motor	1,000 W
Foam motor	100 W
Brush motor	40 W
Clean-water tanks	4 + 16 L
Recovery tank	13 L
Airflow	180 m³/h
Hose length	4 m
Heater	3,300 W
Steam temperature	150 °C
Net weight	32 kg

Application

Professional cleaning workflows such as carpet, upholstery, fabric or vehicle-interior cleaning, subject to the selected configuration and application.

Export & configuration note

Confirm destination voltage/frequency, plug, electrical load, packing, delivery terms, documentation and any destination-specific compliance before ordering. Final configuration is confirmed in a written quotation.

JingBear is a B2B equipment sourcing and solution partner. Technical figures are based on available product documentation; they are not a substitute for a destination-specific quotation.
